A Manual of Health,

An edition of between nine and ten arillions of copies of a very useful work is now ready for gratuitous distribution, and can be lead for the asking at any drug store in the Fulted States, the British Folonies, Spanish America or Brazil. The work referred to la Hostetter's Almanar for 1874. The medical partien of it treats of the various adments to which the human system is subject, and sets forth the pendiar properties of Hostetter's Siousach litters—the purest and best tonic at present known—as a preservative of health and strength, and as a research of chility and disease. The Almanae is printed in all the principal languages of the civilized world and rearless a larger number of families and individuals than any other medical treaties that ever issued from the press. Na man or woman who has a dur regard for that electest that ever issued from the press. Na man or woman who has a dur regard for that electest of heaven's blessings, bestily vigor, should fail to coad the plane, simple and convincing articles which this truly practical publication contains. The miscellaneous matter la warled, instructive and munsing, and the calcular department espicious and comprehensive. However, the professional man, all nead it; and to invalids of buth excess it is literally an article of prime necessity. The medical technicalities which render so many medical treaties lineaded for popular use onintelligible to the general render, have been carefully avoided in this pany that. All is clear, exaplait, faceible and reconcilable with reason and common sense.

The properdores, Mosses, Hostetter & Smith, deit, forcible and reconcilable with reason of common sens.

The proprietors, Mesers, Hostetter & Smith, littedurgh, Pa., on receipt of a two contracts, ames I Gooch tamp, will forward a copy by soail to any cream whiteamorp precises a literature of the little state. Pittdurgh, Pa., on receipt of a two cent etamp, will forward a copy by soull to any person who cannot procure out in his neigh-
